1. Material management

IMM electronics GmbH provides support for the best possible coordination of all factors in the material management process. Coordinated and flexible processes as well as an integrated IT connectivity are our basis for an efficient material management.

Logistics

- from an order logistics controlled centrally by order management
- comprehensive material logistics from purchasing, incoming goods receipt inspection to storage
- intelligent and flexible shipping logistics to the customers of our partners - also world-wide
- · Our services:
 - a personal contact person for you
 - material procurement from around the world
 - acquisition of customers clearances abroad

Manual belt retractor

- for packaging SMD components in blister strips
- . Belt width adjustable from 8 mm to 120 mm
- · Camera for labelling and position control

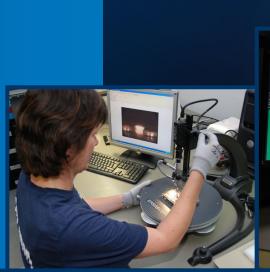

4. Device construction and assembly

The production expertise of IMM Elektronik GmbH encompasses the placement of printed circuit boards, cable assembly and the complete assembly of functional tested modules, devices and systems. The use of optimal manufacturing processes, the shortest manufacturing processing times and highest product quality is planned and realised by our experienced process and inspection engineers. Test designs and procedures are tailored to the specific needs of the products of our customers and create the basis for a zero-defect production.

5. Testing, reviewing, quality assurance

IMM electronics GmbH offers you technically sophisticated solutions at the highest level. The requirements that are placed on the environmental conditions during internal processes are described in all of our procedural, working and testing instructions. In order to also be set up optimally here in the future, IMM electronics GmbH integrates the core competencies of test equipment construction, test equipment design and creation of test designs as well as complete test adaptations. The "time-to-market" is thereby reduced for the customer. Individual tests by the professional association complete our solution package.

Our test engineering:

- Automatic Optical Inspection system (AOI) Viscom 3088-II
- Soldering point inspection system Ersascope
- Visual inspection Magnus HD
- GRS Flying Probe
- Boundary Scan System Göpel
- Evertec / Zevac

Quality at the highest level

Reproducible. Precise. Traceable.
